Introducing ZPE Systems Nodegrid Serial Console to Raritan Dominion® SX II Customers

ZPE Systems, A brand of Legrand, is introducing Nodegrid to **Raritan Dominion SX II** customers. This strategic transition preserves the trusted functionality of the Dominion SX II product line while unlocking next-level performance, scalability, and support via Nodegrid. As always, our top priority is our customers—we're fully committed to ensuring a smooth, seamless experience with dedicated guidance and resources every step of the way. The result is a secure, efficient, and future-ready solution that grows with your needs.

Advantages of Nodegrid Serial Console Appliances:

Nodegrid appliances provide a seamless upgrade path, preserving the features you depend on, and introducing feature and security enhancements designed to meet contemporary requirements:

- **Secure and Modern OS:** Nodegrid appliances operate on a secure, modern Linux-based operating system
- **Integrated 5G Modem:** Internal support for 5G modems eliminates the need for external modems, streamlining connectivity and future-proofing your deployments.
- **Automatic Port Detection:** Simplifies setup with automatic detection of DTE/DCE signals, baud speed, and hostname
- **Support for SAML2 and TOTP Authentication:** Integrated support for modern authentication methods provides enhanced security options.
- **Improved Zero Touch Provisioning Options:** Facilitates automatic deployment via Zero Touch Provisioning (ZTP), supporting TFTP, FTP, SCP, HTTPS, USB, and ZPE Cloud
- **Wide Range of VPN Options:** Supports a broad spectrum of VPN connectivity options, including OpenVPN, IPSec, and WireGuard
- **Wide Range of Models:** Offers a diverse range of models (8, 16, 32, 48, 64, 80, 96 serial ports), including USB serial ports, network ports, and modular versions, ensuring high flexibility.

Additional Benefits

- **Enhanced Performance:** Nodegrid appliances are engineered to deliver superior performance, ensuring seamless and efficient operations.
- **Scalability:** The flexible and modular design of Nodegrid appliances facilitates easy scalability, accommodating future growth and changes.
- **Comprehensive Support:** Benefit from Legrand's extensive support network, ensuring timely assistance and support.

Transitioning to Nodegrid appliances is simple and efficient with Nodegrid Manager, which consolidates access and control of IT devices into a single, intuitive interface. Nodegrid Manager simplifies the management of existing infrastructure by providing secure, centralised out-of-band management. It supports automatic, policy-based discovery and management of Dominion SX2 devices, ensuring that all existing appliances are easily organised and controlled.

The transition to Nodegrid appliances will provide a more secure, efficient, and scalable solution, enhancing your overall operational capabilities.

Both **Raritan** & **ZPE Systems** serial consoles and their target devices can be accessed from single management system
